Building a
Risk Management
Framework
for the DNS

W

WESTLAKE
GOVERNANCE

A risk management framework is

not a risk or threat assessment

but what you put the assessment into

that helps you manage risks
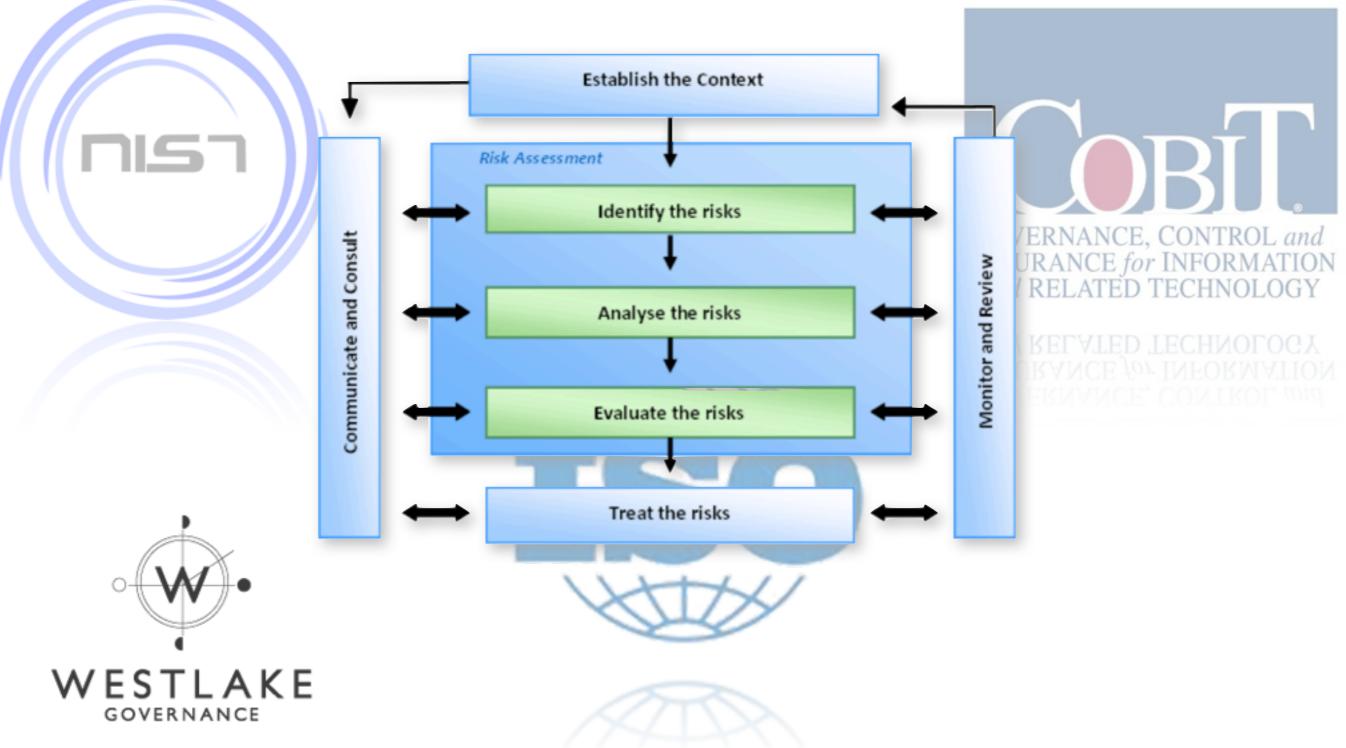

and prioritise actions and investments

to mitigate the risks

WESTLAKE
GOVERNANCE

Risk frameworks in the wild

How we will build it

Come to Toronto to gather information	✔
Develop principles to cover DNS Risk Management	
Analyse candidate frameworks against principles	
Tailor it to fit multistakeholder environment	
Test it using example risks from DSSA WG	
Present it at Beijing
